

JOB ASSISTANT

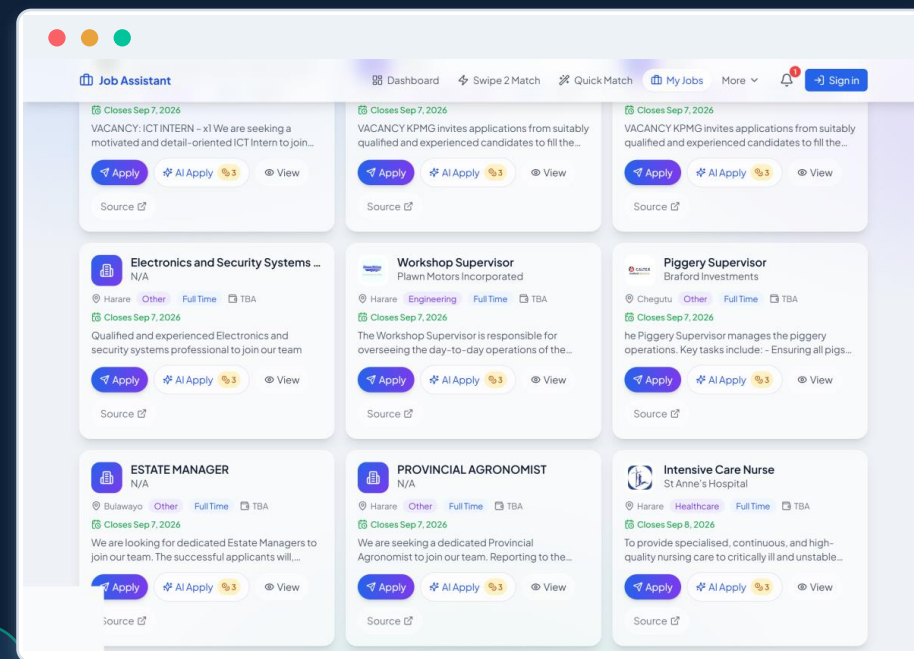

# Apply smarter. Hire faster.

A two-sided AI talent marketplace for Zimbabwe & Southern Africa.

AI-tailored applications

Verified candidates

~85% gross margin

The live jobs board — Apply or AI Apply on every role

Investor & partner brief

# Applying is broken on both sides

## RECRUITEE

### Job seekers apply blindly

- Generic CVs, no idea if they even match the role
- Many first-timers have no CV at all
- Good roles sit scattered across boards and expire unseen

## RECRUITER

### Employers drown in noise

- Piles of unqualified, unverified applicants
- No fast way to reach active, screened candidates
- Hiring drags on and costs mount

# One platform, two doors

## **“I’m looking for work”**

- Aggregated jobs, de-duplicated & enriched
- AI-tailored applications sent from your own Gmail
- Build a CV from scratch — no CV needed to start
- Swipe-to-match + verification badges

## **“I’m hiring”**

- Searchable pool of profiled candidates
- Swipe-to-shortlist the right people
- Pay-to-unlock verified contact details
- In-app messaging, end to end

# The tailwinds line up

01

## AI cost collapsed

Running the tailoring model on Cloudflare Workers AI costs a fraction of a cent per action — margins impossible two years ago.

02

## Local-first

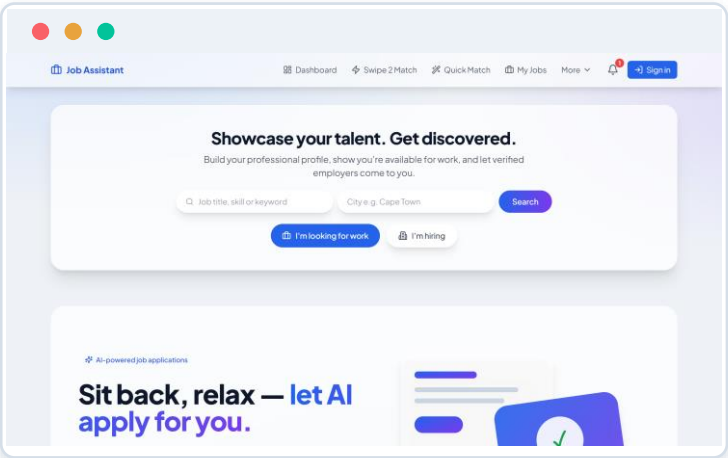

Zimbabwean job-board coverage, USD pricing with mobile money (Paynow/EcoCash) on the roadmap, Gmail-native sending employers trust.

03

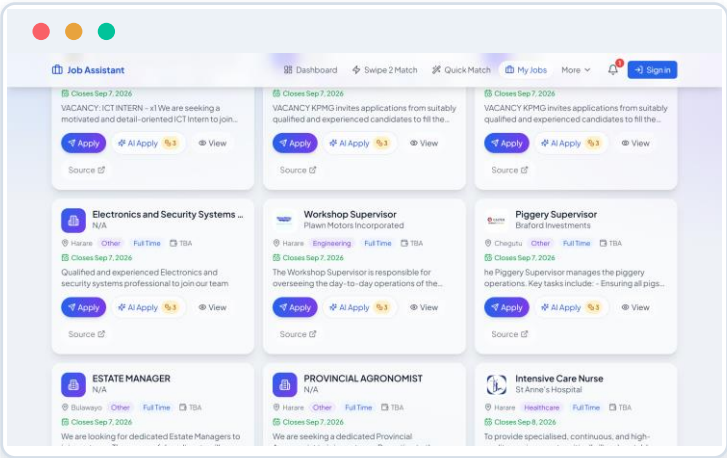

## Two-sided moat

Every verified candidate makes the employer side more valuable — and every employer makes the seeker side more valuable.

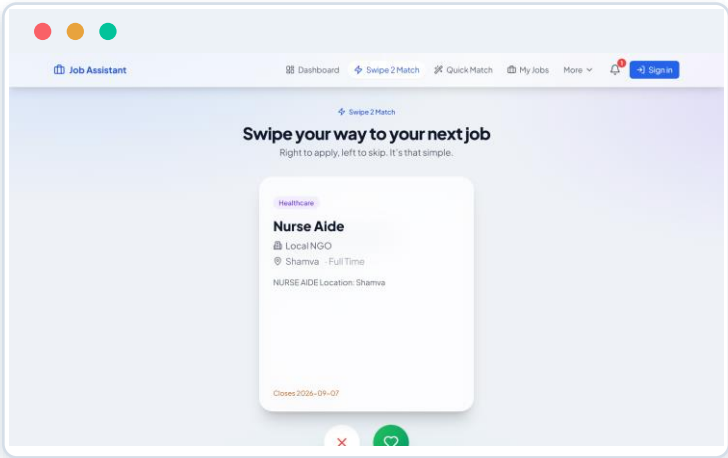

# The app today — not a mockup

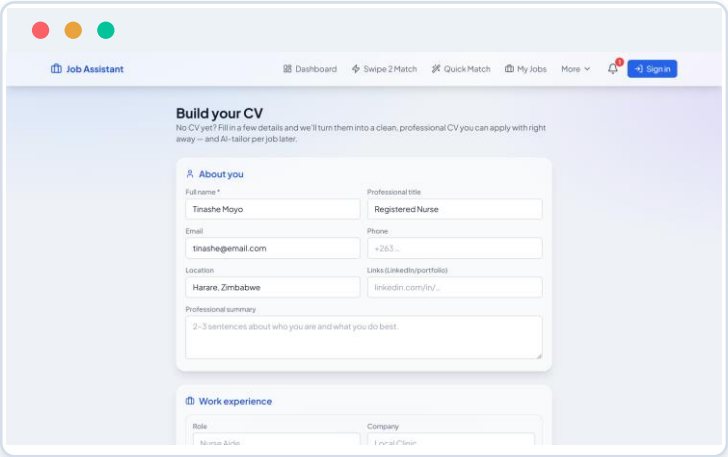

Landing — “looking for work” or “hiring”

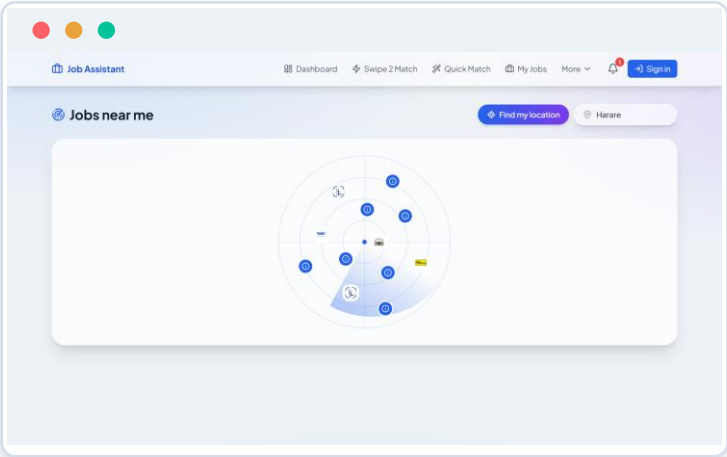

Jobs board — Apply / AI Apply / View / Source

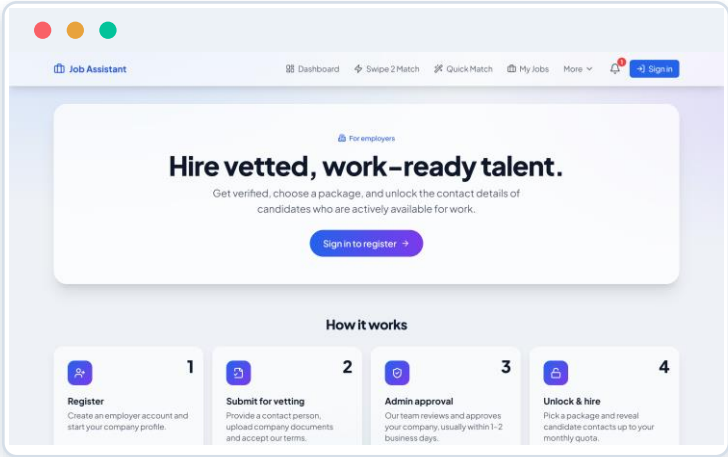

Swipe 2 Match — right to apply, left to skip

CV Builder — no CV? build one in minutes

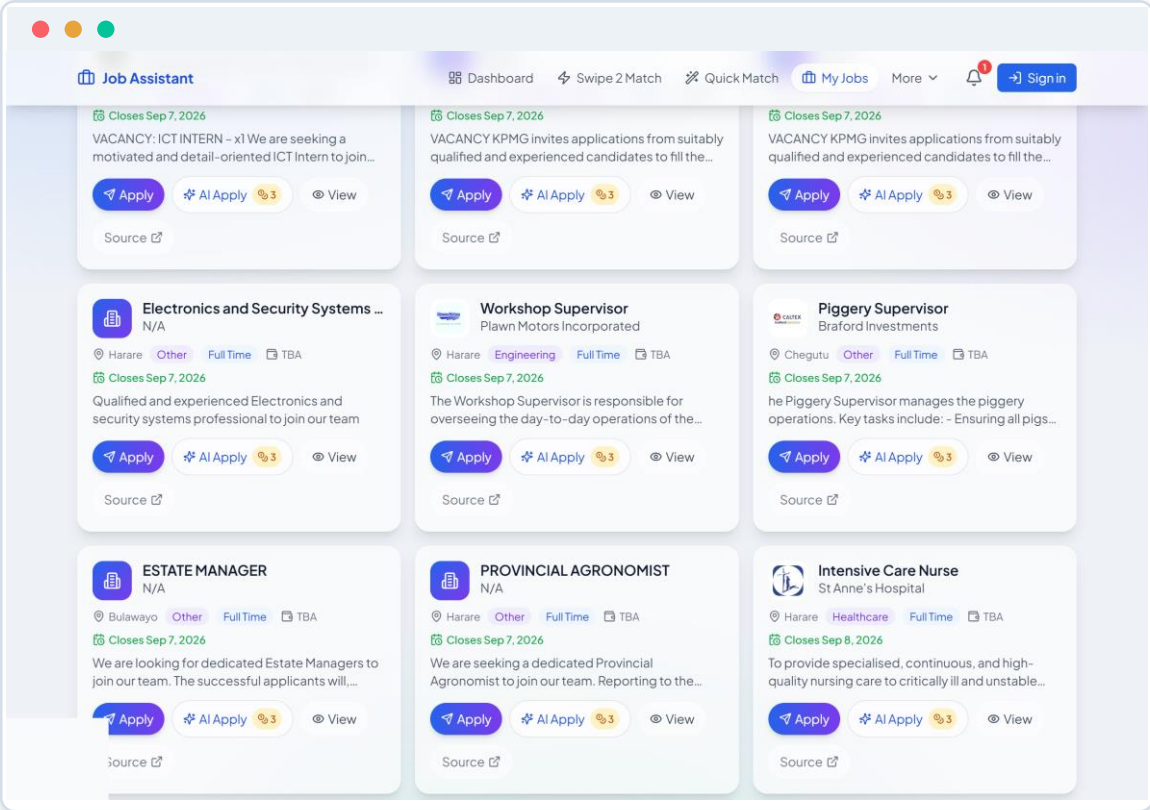

Jobs Near Me — radar by city

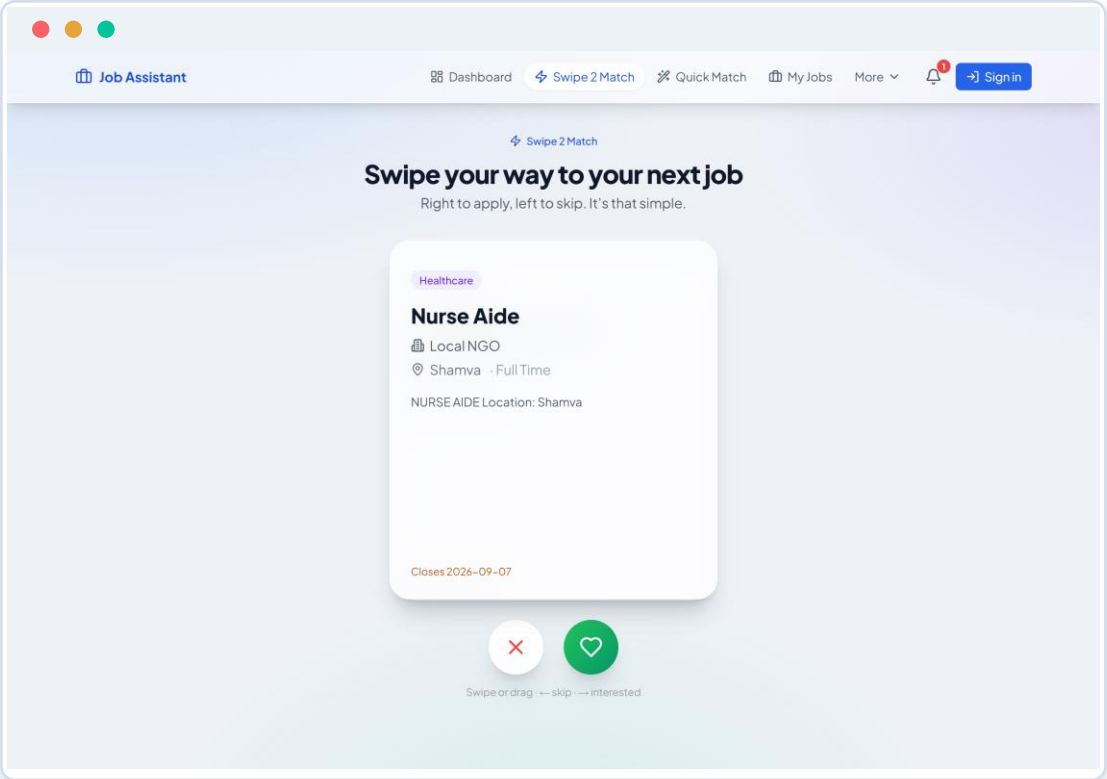

Employers — register, vet, unlock, hire

# From blank page to sent application

Every job: Apply (free, your CV) or AI Apply (3 cr, tailored)

Swipe 2 Match — a Tinder-style deck for jobs

# Register → discover → unlock → hire

1

## Register & get approved

Company + verification doc reviewed by an admin before any unlock.

2

## Browse candidates by sector

Profiled cards with skills + verified badges.

3

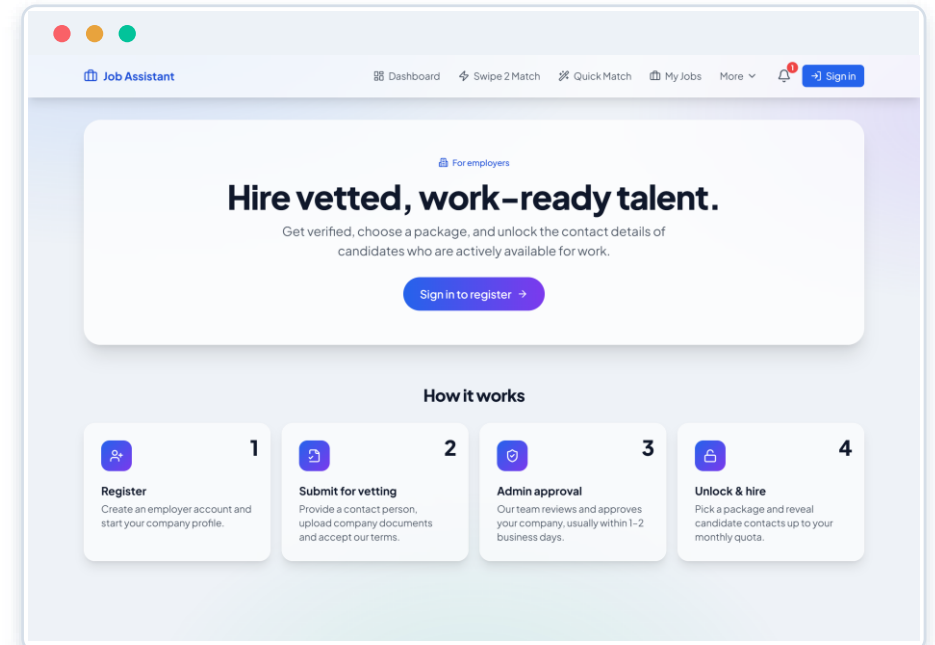

## Swipe to shortlist

A recruiter swipe deck to shortlist fast.

4

## Unlock & message

Revealing contact spends credits — the core revenue event — then chat in-app.

Two-sided marketplace — the employer entry point

# Prepaid credits — spend on what matters

What credits are spent on (live)

| Action                        | Cr    | ≈ USD       |
|-------------------------------|-------|-------------|
| AI Apply — tailor CV + note   | 3     | \$0.11–0.15 |
| Match all jobs to my CV       | 5     | \$0.18–0.25 |
| Quick Match (batch)           | 10    | \$0.35–0.50 |
| Unlock a candidate · employer | 20    | \$0.70–1.00 |
| Background check              | 15–30 | \$0.53–1.50 |

New accounts start with 50 free credits.

# The AI is nearly free to run

~\$0.003

cost to serve one AI Apply\*

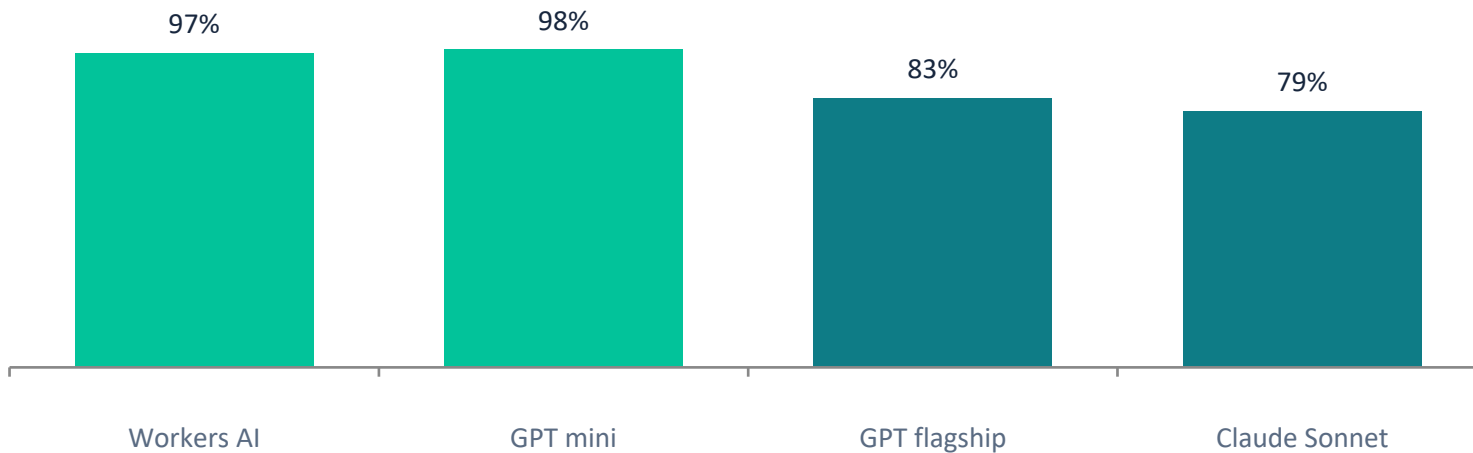

~\$0.12

price charged for it

~97%

gross margin on Workers AI

Gross margin per AI Apply, by model (est.)

**Even a full switch to a premium model keeps AI actions ~80% margin.**

The credit price is decoupled from the model. Non-AI costs (Workers, KV, Vercel, Stripe) stay small and flat.

# Provider-agnostic by design

The app runs Cloudflare Workers AI or OpenAI and falls back automatically. Four levers if model cost rises:

1

## Absorb it

Margins tolerate a flagship model (~80%).

2

## Re-price credits

AI Apply 3 → 4 restores margin instantly.

3

## Tier by model

Cheap default; premium as a paid “Pro tailoring” upsell.

4

## Cache & batch

Job detail + match results already cached in KV.

**Expected result:** cost/AI action moves ~\$0.003 → ~\$0.02–0.03 worst case; blended margin stays ~80%+ with no price change, or ~95%+ with a 1-credit bump.

## EXPECTED RESULTS

# Illustrative funnel — to validate

### Seeker funnel · per 1,000 signups

Sign up (50 free credits)

Add a CV (60%)

Use a paid AI action (25%)

Convert to a top-up (8%)

~\$480

per 1,000 signups from seekers (before repeat purchases)

~\$160 / mo

20 active employers × 10 unlocks × ~\$0.80

~\$1,280 / mo blended

2,000 seekers + 40 employers · ~85% margin

# Now → next → later

## NOW

- Job aggregation & AI Apply
- CV builder
- Swipe match
- Employer unlock & messaging
- Verification + Stripe credits

## NEXT

- Paynow / EcoCash top-ups
- Employer subscriptions
- Featured job posts
- Referral credits
- WhatsApp delivery

## LATER

- Recruiter analytics
- ATS integrations
- Regional expansion (SA first)

## THE PITCH

**From a blank page to a sent, tailored application in minutes — and that verified applicant into a hire.**

On margins that work — because the AI is nearly free to run.

Let's build the region's hiring layer
